

DATASHEET

# One Identity Hybrid Subscription

'Join' the cloud at your speed of business

## Benefits

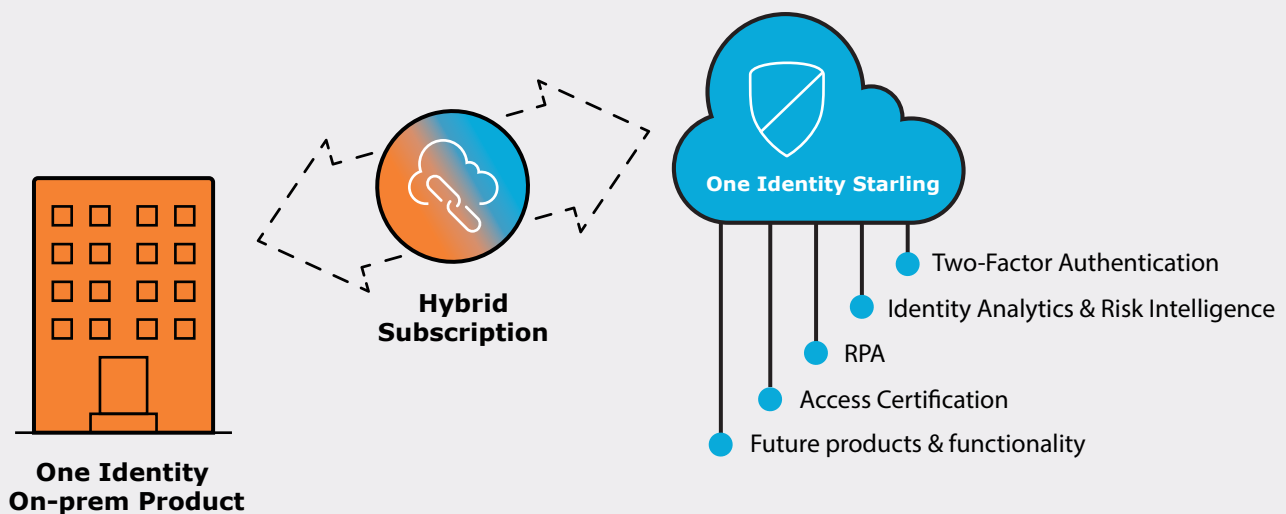

- Connect your One Identity on-prem solutions to the cloud
- Receive additional functionality and more frequent releases without costly upgrade cycles
- A single subscription for all your One Identity products
- Immediately access new products and features via the One Identity Starling platform
- A portfolio to meet today and tomorrow's business needs
- Low annual subscription

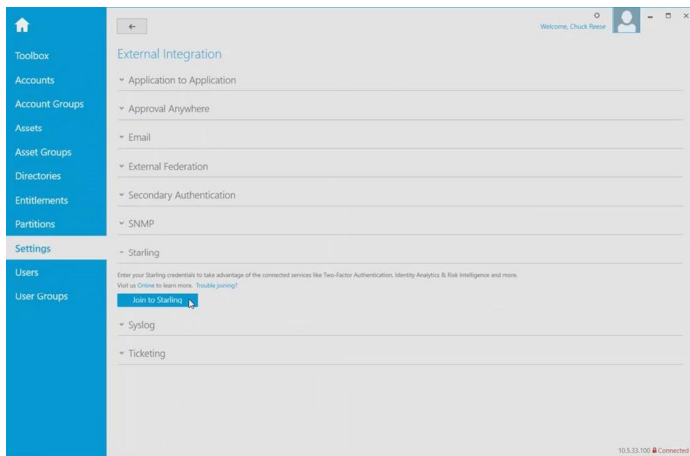

## Overview

If you are like other organizations, you are working to move your infrastructure to the cloud but aren't making the switch all at once. For the foreseeable future, you will leverage your current IAM infrastructure to deploy a hybrid model while your organization completes its move to the cloud. The problem is that most IAM vendors tend to offer an 'all or nothing' approach. If you have significant investment in on-premise IAM, you cannot simply pull the plug and start over in the cloud.

With the One Identity Hybrid Subscription offering, you can smoothly transition to a hybrid environment on your way to the cloud. The subscription enables you to 'Join' your One Identity on-prem solutions to our One Identity Starling software-as-a-service platform. Giving your organization immediate access to a number of cloud-delivered features and services, which expand the capabilities of your One Identity on-prem product.

One Identity's modular and integrated portfolio of on-prem, cloud and hybrid IAM solutions enables you to start anywhere and build from there.

**Figure 1.** Initiate your subscription within One Identity Safeguard and 'Join' to One Identity Starling.

## Features

A set of subscription features are available today and will be followed by an extensive roadmap of additional products and functionality. A single subscription can be used for all your One Identity products.

### Starling Two-Factor Authentication

Lock down administrator and user access with multi-factor authentication as a service. Solves the password problem to secure your organization and keep your users productive.

- Enhanced privileged AD account security
- Accelerated password-reset process that reduces risk of social engineering
- Manage privileged access requests, without VPN – One Identity Safeguard users can approve or deny any request from anywhere
- Push-to-Authenticate – mobile-enabled authentication capabilities, including automated texting of codes to admin and user phones for an additional level of security

## Starling Identity Analytics & Risk Intelligence (IARI)

Enhance security with an improved awareness of potential high-risk or high-impact user access so that you can remediate such risk before an issue occurs. With Starling IARI, you can analyze and compare user entitlements to pinpoint anomalies and better focus corrective actions while ensuring you're in line with industry best practices.

- Access visibility and entitlement discovery
- Detailed insight and actionable analysis
- Risk analysis, comparison and classification
- Accelerated remediation

For an additional cost, these offerings can be extended to additional target systems and use cases.

For a free trial of our One Identity Starling offerings and to get the latest product feature updates, visit [One Identity Starling](https://www.oneidentity.com/starling).

## Coming Soon!

More applications and features – One Identity will continuously make available new products and features to our One Identity Starling SaaS platform. With the One Identity Hybrid Subscription, you can immediately use these features for your One Identity on-prem solutions.

## About One Identity

One Identity helps organizations get identity and access management (IAM) right. With our unique combination of offerings, including a portfolio of identity governance, access management, privileged management and identity as a service solutions, organizations can achieve their full potential – unimpeded by security, yet safeguarded against threats.
