

Spuerkeess inspires customers' confidence with centralized identity and access management

Banking

Country: **Luxembourg**

Employees: **2,500**

Industry: **Banking – commercial, private, and retail**

As the leading national financial institution in Luxembourg, government-owned Spuerkeess continues to win awards as one of the safest banks in the world.

Spuerkeess deployed Identity Manager to strengthen its security and compliance practices, thereby safeguarding its brand and ensuring the trust of customers and regulators.

The Spuerkeess experience

“The main benefit of Identity Manager is being fully compliant with regulations, mostly through automation. In this industry, you have to keep up with all the regulations, both national and European, and the automation helps us do that. The attestation process is our main focus right now, and we're working to integrate the full process with Identity Manager in order to automate and simplify it.”

-Yoann Switala, Solution Architect IAM/PAM, Spuerkeess

Benefits

- Efficient, compliant governance, and recertification
- Wide-ranging automation to minimize the likelihood of compliance gaps and errors
- Stringent, business-aligned access security in spite of resource constraints
- Complete platform for centralized identity and access management
