

Western Carolina University elevates its reputation as a trusted institution

Education

Country: **United States**

Employees and students: **~14,000**

Industry: **Higher education**

Western Carolina University (WCU) is like a small city in the complexity and breadth of educational and supporting services it provides.

WCU adopted Identity Manager to simplify account management for its small IT team and mitigate potential security and compliance risks.

The WCU experience

"We have been an Identity Manager customer for about 10 years. It's a big application, and you can do a lot with it. The automation is amazing."

- Joshua Bright, IT Identity Security Specialist, Western Carolina University

Benefits

- Compliance certifications within 3 days instead of 3 months
- Secure, consistent access to data and systems only for trusted users
- Substantial time savings for IT with close to 100% automation of provisioning and other processes
- Business owners in control of data recertification within their domain

Solutions at a glance
